Housing Need and Local Affordability Analysis

April 2018
Headline Information

A family seeking to buy an average home in Waverley would now require an income of over £102,167 to afford the mortgage, making home ownership unavailable for many.

Work is no guarantee that local people will be able to pay all their housing costs. 28% of Waverley’s housing benefit claimants are in work.

The cost of renting privately is becoming less affordable with average monthly rents now standing at £1,050 in Waverley. This means people working in the borough can spend 42% of their income on rent.
1. Overview of the borough

Waverley is an affluent borough in the South West corner of Surrey, with high demand for housing, high house prices and above average incomes.

The borough covers 133 square miles and is predominantly rural, with most residents living in four main urban settlements, surrounded by villages set amongst the countryside and attractive natural landscape. Nearly three quarters of Waverley’s population lives within one of the four largest settlements: Farnham 39,000, Godalming 22,000, Haslemere 17,000 and Cranleigh 11,000.

61% of the land in Waverley is designated as Green Belt. In addition to this 92% of the land in Waverley borough is rural. Much of the borough’s countryside is designated as an Area of Outstanding Natural Beauty (AONB), nature reserve and/or Area of Great Landscape Value (AGLV).

Waverley is a prosperous area with low unemployment at 2.9%¹ when compared to the national average of 5.1%. The population is highly qualified and 43% of those in employment commute outside the area to work, many to access higher paying jobs in London. A significant number of workers from outside the borough also commute into Waverley.

Ranked as one of the least deprived areas in Britain², Waverley’s residents enjoy an above average life expectancy and there are low levels of crime. However, both urban and rural areas of the borough are deprived in terms of barriers to housing due to lack of affordability. There are pockets of relative deprivation which remain a challenge in Waverley³. Some of the borough’s rural villages lack services including public transport, supermarkets, schools and healthcare.

2. Demographics

The population in Waverley is over 123,300. Current estimates suggest this will increase by around 5% during the lifetime of this strategy⁴.

There is less ethnic diversity in Waverley than across Surrey as a whole. 95% of Waverley residents described themselves as white in the 2011 Census. This compares to the Surrey average of 90% and England average of 85%⁵.

A key driver of change in the housing market over the next 20-25 years is expected to be the growth in the population of older people. 19.5% of Waverley’s population is over 65 and this is set to increase⁶, having implications for residents’ independence, housing, care

services and community safety. In particular, the demand for extra care and specialist dementia care accommodation is expected to significantly increase in the coming decades\(^7\). The proportion of very elderly (85yrs+) residents in Waverley is the highest in Surrey\(^8\). Planning for the right type of housing and care for this age group is a significant challenge for the housing and planning authorities, social care and health partners working together to address this need.

21.3% of households in Waverley contain someone with a long term health problem or disability\(^9\), a higher proportion than for the other Surrey authorities. We know that there are over 900 people with learning disabilities or autism living in residential homes in Surrey, however, the Adult Social Care Commissioning team has identified the need for more independent or individualised accommodation for some of these households. It will be necessary to plan to meet some of this need in Waverley. In addition, many young adults with learning disabilities who live with their parents will require suitable alternative accommodation when their ageing parents are no longer able to care for them\(^10\).

3. Local housing stock
There are currently 52,734 homes in Waverley\(^11\). The majority of residents own their homes and a significant number live in rented homes\(^12\). The breakdown of different housing types is shown in Figure 1.

Housing Need and Affordability Analysis
Annexe 1 to Housing Strategy
Unoccupied empty or second homes are an issue in Waverley with 4.5% of homes in the borough having no permanent residents. Home ownership is the dominant tenure in Waverley (73.7%), with 11.3% of residents renting privately and 12.4% living in social rented housing. The remaining 2.7% residents live rent free or in shared ownership accommodation (see Figure 3).

4. The national housing affordability crisis

A significant number of households in England cannot afford market housing without support.

The average annual full-time earnings of people working in the lowest-paid occupations range from £17,665 to £18,462 in care, leisure and other service occupations. This is about £10,000 less than the national full-time median of £28,213.

People in lower-paid occupations are particularly affected by the affordability crisis, having seen housing costs moving further out of reach of their earnings than for any other occupational group. As access to home ownership in the South East of England becomes increasingly dependent on access to family or inherited wealth, so the gap between those able and those unable to draw on such resources widen (see Figure 4.)

The pressure is particularly keenly felt in areas of high housing costs like Waverley, presenting a barrier both to private renting and to home ownership for low income households.

Housing Need and Affordability Analysis
Annexe 1 to Housing Strategy
The three occupational groups with the lowest median earnings (caring and leisure; sales and service; elementary occupations) are required to spend high proportions of their earnings on rent payments across all nine English regions. The typical (median) rent of a worker in all three occupational groups takes up 40% or more of their earnings in the majority of local authorities in London and the South East (see Figure 5.)

Privately renting is often the only option available to those with median or below median incomes, however, certain parts of the private rented sector are badly managed and poor quality. Few private landlords offer long term security for families.

In recognition of the severity of the national affordability crisis, the government announced a £125 million increase in the targeted affordability funding available to assist in high rent pressure areas in the November 2017 Budget.

### 5. What is affordable housing?

The government defines affordable housing as "social rented, affordable rented and intermediate housing provided to specified eligible households whose incomes".

---

16 National Housing Federation research
17 Figure 10, NHF, 2017
18 Resolution foundation home truths
needs are not met by the market. When the housing is built, it is safeguarded as affordable housing in perpetuity by a legal agreement to ensure that upon re-let or resale, it is again made available to eligible households in housing need.

In Waverley, the main affordable tenures are social rent (around 55-60% of market rent), affordable rent (around 80% of market rent) and shared ownership, also known as part-rent, part-buy.

There are currently 6424 affordable homes in Waverley. These include social rented, affordable rented and shared ownership homes owned by the council and housing associations.

The different affordable tenures meet a range of housing needs across the broad spectrum of households who cannot access market housing. However, as discussed below, for many households in Waverley, social rented housing remains the only genuinely affordable tenure.

6. Affordability in Waverley

The borough has high levels of economic activity and is one of the least deprived areas in England. The attractiveness of the borough is reflected in its house prices which are among the highest in Surrey.

It is vital to Waverley’s prosperity that it continues to deliver high quality health, educational, care and security services, yet high property prices in Waverley are pricing out essential workers such as teachers and care workers. As a result, some employers are finding it difficult to recruit and retain staff. In particular, attracting enough care workers to care for Waverley’s ageing population is becoming a pressing issue.

Making affordable housing options available to low and middle income workers benefits the local economy by ensuring the continued provision of key services and reducing staff turnover in these services. Workers are then able to put down roots in the area, becoming an integrated part of the community they serve and at the same time reducing pressure on local transport infrastructure.

a. Incomes in Waverley

The median gross pay of people working in Waverley is £30,352 pa compared with the median gross pay of people living in Waverley of £38,870 pa. This suggests many Waverley residents who work elsewhere commute out of the borough to access higher paying jobs as opposed to people living and working or travelling into the borough for work (see Figure 6).

Housing Need and Affordability Analysis
Annexe 1 to Housing Strategy
Household formation rates for 25-34 year olds have reduced significantly since 2001\textsuperscript{24}. Younger families in Waverley are often unable to move out of their parents’ homes or shared accommodation.

b. Affordability of home ownership in Waverley

Waverley is one of the most expensive places in Surrey to buy a home. In February 2018, house prices in Waverley were well above the average for England and the South East (see Figure 7). An average home in Waverley now costs £454,075.

Lower quartile prices give an indication of what it would cost a family in Waverley to buy their first home (see Figure 9).

<table>
<thead>

</tr>
</tbody>
</table>

Based on a 90% mortgage, 3% interest rate and lending at 4 x income.

Lower quartile prices give an indication of what it would cost a family in Waverley to buy their first home (see Figure 9.)

Using the above figures, an income of £102,167 is required for a 90% mortgage on an average property (see Figure 8).

Even those households with above-average incomes in Waverley find their access to homeownership severely restricted, with a household income of over £80,000 and deposit of over £36,000 required to purchase a lower quartile semi-detached home (see Figure 10).

c. Affordability of shared ownership in Waverley

Shared ownership provides an opportunity for people who cannot afford open market housing to access the housing ladder. Shared ownership purchasers buy a share of the equity in the property, increasing their share over time if they can afford to do so (known as ‘stair-casing’). Rent is payable on the equity retained by the council or housing association.

The equity share for sale varies from 25%-75%. However, even a 25% share plus rent can be too expensive for people on medium and low incomes.

A household is considered able to afford to buy a home if it costs 3.5 times the gross household income for a single earner household, or three times the household income for dual income households.

Based on these examples and the median salary in Waverley of £29,770, shared ownership offers a viable option for some residents, subject to them being able to secure a mortgage and having the necessary deposit. However, larger shared ownership houses suitable for families command significantly higher values and may be beyond the reach of local families in housing need.

Figure 1 and 2 are based on shared ownership properties currently for sale in Surrey:

d. Affordability of private renting in Waverley

Work is no guarantee that people can afford the cost of renting. 21% of Waverley’s housing benefit claimants are in employment\(^\text{32}\) (see Figure 13). A comparison of income and rents shows that 42% of gross income goes on rent in Waverley\(^\text{33}\).

The median monthly private sector rent in Waverley 2015/16 was £1,050\(^\text{34}\) (see Figure 14).

<table>

</tbody>
</table>

The shortfall is the amount of money a family would have to find per calendar month (on average) from their personal income after any assistance from housing benefit has been paid.

e. Affordable rent and social rent

Historically the guide to what is affordable rent has been 35% of a household’s net income\(^\text{37}\). The government introduced the ‘affordable rent’ tenure (80% of market rent) in 2011, meaning that new development requires less grant. Whilst the new tenure falls within the government definition of affordable housing, it means some households could spend over £14,000pa on an affordable rented property in Waverley. The average social rent is around £8,000 per annum. For households on very low incomes in Waverley, the only genuinely affordable tenure is social rent.

Affordable rented homes and social rented homes are allocated to eligible households on Waverley Borough Council’s Housing Register. Households with a gross annual income of over £60,000 or savings/ assets in excess of £30,000 are not eligible to join the Housing Register. However, a larger family with an income of £60,000 may struggle to buy or to privately rent a property to meet their needs in Waverley. These families may look to shared ownership, for which households with an income of up to £80,000 are eligible.

7. Housing Need in Waverley

a. The Housing Register and Help to Buy Register

There were over 1400 households on Waverley’s housing waiting list (the Housing Register) as at 1 April 2018. In total, 269 households secured affordable rented accommodation in 2017/18 through the Housing Register.

The households who secured affordable rented accommodation in 2017/18 waited on average 2 years and 9 months before being offered affordable accommodation. Those requiring a 2 bedroom property waited the longest.

Over 600 households living or working in Waverley are currently waiting for a shared ownership home on the Help to Buy Register.

b. Homelessness prevention

Waverley’s Housing Options team received contact from 869 households regarding homelessness during 2017/18. 254 households were prevented from becoming homeless by Waverley’s Housing Options team during the year and 549 new applications to the Housing Register were processed.

c. The Strategic Housing Market Assessment (SHMA) 2015

The SHMA\textsuperscript{38} is an assessment of current and future housing need in the borough based on current statistics and projections. The latest SHMA was produced in 2015, covering the West Surrey housing market area shared by Waverley, Woking and Guildford councils. The SHMA informs the calculation of the number of new houses needed for the lifetime of the Waverley Local Plan.

Hidden households

The SHMA estimates that there are 374 ‘concealed households’ in Waverley. These are households within a household and are often young families living with parents and unable to form a household of their own due to high housing costs. 73% of these concealed households cited unaffordability of housing as the reason for their housing situation.

Projected growth and future housing need

Waverley’s Local Plan which was adopted on 20.02.18 requires the number of new homes that should be built each year in Waverley should be 590.

Housing for older people in Waverley

Within Waverley it is expected that a growing older population will result in an increase in the number of people with dementia by around 1,800 from 2013-31, and growth in the number of persons with mobility problems of over 3,500.\textsuperscript{39}

Some older households will require specialist housing. The SHMA identifies a need for over 3,950 additional specialist units of housing for older people across the housing market area from 2013-2033, including sheltered and extra care homes, with 1,700 of those required in Waverley (see Figure 15).

\textsuperscript{38} Strategic Housing Market Assessment 2015

\textsuperscript{39} West Surrey SHMA 2015
In addition, the SHMA indicates a need for 1,031 bed spaces in care homes (396 in Waverley). This does not form part of the household population; it is therefore additional to the need identified for housing above.

**Suggested future housing mix for Waverley**

The SHMA recommends the best mix of housing to meet future need across the West Surrey Housing Market Area (see Figure 16 and 17).

The SHMA data is used alongside local evidence, including the Housing Register, Help to Buy Register and rural housing needs surveys, when planning the mix of affordable housing required on new developments at planning application stage.
